

SAMPLE STATION #1

MIDAS # 5500
ROUND POND

PLYMOUTH TWP, PENOBSCOT CO, MAINE

AREA 134 ACRES

ROUND POND
(Grey Pond)
Plymouth Twp., Penobscot Co.
U.S.G.S. Brooks, Me.(7½')

Fishes

| | |
|-----------------|---------------------|
| Largemouth bass | White sucker |
| White perch | Hornpout (bullhead) |
| Yellow perch | Pumpkinseed sunfish |
| Chain pickerel | American eel |
| Minnnows | |
| Golden shiner | |
| Creek chub | |

Physical Characteristics

Area - 134 acres

Maximum depth - 30 feet

Temperatures:
Surface - 70°F
30 feet - 54°F

Principal fisheries: Largemouth bass, white perch, yellow perch, chain pickerel

Round Pond should be managed for warmwater species. Most of the pond has a depth of less than 20 feet and maintains equal water temperatures at the surface and bottom.

Largemouth bass were first observed during routine netting in 1993. The bass population probably became established from fish emigrating from Plymouth Pond located downstream. Currently the bass population is low in numbers but considering the favorable habitat the population should continue to increase.

No stocking is recommended at this time.

Surveyed - August, 1958
